

# MELTDOWN APEX-C™

SNOW AND ICE HAVE  
*CLEARLY*  
MET THEIR MATCH

Meltdown APEX-C™ is a superior clear, corrosion inhibited anti-icing and de-icing product that provides enhanced performance even at the lowest temperatures in winter. Aiding in corrosion control, Apex-C™ can be applied directly to paved surfaces to prevent snow and ice bonding - resulting in safer roads. It also lowers the refreezing point, creating less ice for faster snow removal while increasing traction.

Amber in appearance, APEX-C™ is odorless and doesn't stain exterior surfaces.

## Features

- Freeze point of -30°F
- Appears clear to amber with little to no odor
- Can be applied directly to road surface
- Does not separate or require agitation in storage
- Anti-icing application rate of 15 gallons per lane mile, De-icing application rate of 45 gallons per lane mile
- Stockpile application rate of 6 gallons per ton

## Benefits

- Breaks bonds of ice and snow at the surface
- Provides a longer cycle time between snowplow routes
- Lowers costs of repairs and damage to vehicles and infrastructure
- Does not stain and is environmentally sensitive
- Performs consistently and reliably

Compared to traditional 32% Calcium Chloride and Rock Salt, APEX-C™ is 70% less corrosive. Apex-C™ meets all of the Pacific Northwest Snowfighters specifications and has a corrosion score of less than 30 to be approved to the PNS Qualified Products List (PNS Category A2, Corrosion Score of 24)
